Who we are

In love with paper

We are paper disposables manufacturer for the HORECA industry and we are specialized in the personalization of paper napkins, paper cutlery pochettes with napkin and paper chopstick pochettes.

We follow up the manufacturing process from the mother roll to the final pallet; we supervise all the stages of production step by step.

We can guarantee productive flexibility, time-to-market and an effective pre and post sales support.

Our mission is becoming the right partner for every foodservice professional that want to add an original and personal touch to their location.

Why choosing us

Quality of the raw materials

In order to provide a superior quality and exclusivity and to ensure pureness, softness and strength of our products, we use only pure cellulose wadding paper, supplied by the most renewed Italian and European papermills. A superior pure cellulose wadding quality is the first step to guarantee printing quality both in terms of colour tone and graphic precision.

High productive flexibility

Thanks to our productive flexibility, we are able to satisfy specific requests for customized packaging solutions and minimum order quantities. The main issue is to listen constantly to our customer needs, in order to satisfy also out-of-standards packaging requirements.

Logistic and delivery

We rely on collaborations with the most trusted freight and logistic companies to ensure high coverage of the national and international market as well as a safe and timely delivery. With our distributive and commercial network, we guarantee an efficient and fast service to satisfy time-to-market and post-sale support. We always check with our customer the best delivery solutions.

Our Know How

Life long experience in paper disposables manufacturing and personalization has led us to offer know-how and high quality standards. The experience gained over the years, allow us to guarantee nowadays high quality personalized paper disposables at the best price.

Certifications

We had always been strongly focused on environmental respect and high quality of the raw materials. Nowadays, is proud to join an international non profit initiative like FSC[®] (Forest Stewardship Council). Our membership with this project led us to use certified raw material, coming from responsibly managed forests. When you see the logo FSC[®], you can be confident that wood or paper products are made of material derived from forests, in which high ecological - social - and economic standards are respected.

“A responsible forest management means: preserving the natural environment, leading real benefits to population, local community and workers and ensuring economic efficiency.”

Request our products FSC[®]certified.

Disposable Hygienic Kits

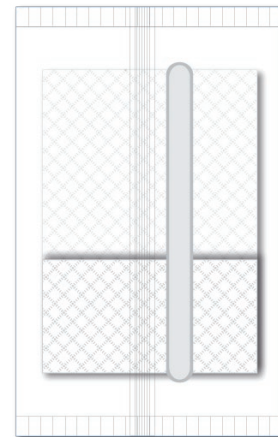

An high level of hygiene means, above all, health and safety for your customers, and it's the basis of every place where foodstuffs is served.

Converting & Trade is pride to offer high quality products, in order to provide to all of your guests an hygienic and safe place, minimizing the risk of exposure to virus, bacteria or microorganisms.

Converting & Trade's original disposable hygienic kits, have the function to eradicate all of the steps, that a worker in an ice cream shop, bar or bakery have to execute, in order to serve its customers. These ready-to-use hygienic kits can be picked up directly by the customer, with his own hands, without any problems.

Eco friendly products range

Ecology and sustainability are two words grounded in our industrial philosophy, because Green is not only today, Green is also a wish for tomorrow. In collaboration with our suppliers and our customers, we've always been on the lookout of new products with low environmental impact, in order to offer eco-friendly solutions in an ever more careful and selective market.

This is why we took the decision to introduce new products made of compostable and sustainable raw materials such as paper napkins packed with PLA film and paper cutlery pouches made of kraft paper + BioPOS.

PLA (polylactic acid) is a cutting-edge bioplastic, derived from the transformation of sugars present in corn, beetroot, sugarcane and others natural and renewable materials. Unlike the traditional plastic, PLA does not come from oil, in fact this material is biodegradable and compostable, therefore when it reaches perfect humidity and temperature, it degrades quickly in soil.
